

What Water are Your Employees and Customers Drinking?

Get the Best Drinking Water on
the Planet in your Office!

Pure Water Technology is the most effective way to provide fresh, pure, oxygenated drinking water to your clients and employees. Pure Water Technology has a unique self-contained point-of-use dispenser that delivers both purified hot and cold water at the touch of a button without the bottle. We use a five stage process, including Reverse Osmosis to remove 99 percent of all the impurities. Plus we re-oxygenate the water for better taste and to keep it bacteria free and safe.

Uninvited guests are making themselves at home in bottled drinking water!

Once the water in bottles is opened it becomes an open system, exposed to a variety of airborne contaminants. Everything that comes into contact with the bottle ends up in the drinking water. Once introduced, these organisms find a welcome home in a pool of untreated water. Everyone knows that an un-chlorinated swimming pool will turn green – the same thing can happen in a bottled water cooler.

PURE WATER TECHNOLOGY
all from a name you know and trust

No more big plastic bottles to dispose of or clean – nothing... just pure drinking water available at the touch of a button.

WHAT COULD BE MORE ENVIRONMENTALLY FRIENDLY?

Benefits of Pure Water Technology

SAFETY

- Stop lifting 40 lb. water bottles
- Reduce worker's compensation risks

COST SAVINGS

- Eliminate cost increases as consumption rises
- One invoice
- No packing slips or monthly statements to reconcile
- No bottle deposits, delivery charges, or fuel surcharges
- No wasted storage space for full or empty bottles

CONVENIENCE

- No more running out of water

HEALTH

- Pure drinking water
- Eliminates airborne contamination

SECURITY

- Eliminates bottle deliveries
