No added costs, no added waiting. The IntoPrint RF1430 digital finishing system is an on-demand roll-to-roll converting system that laminates, cuts, strips and slits your labels in one pass. The RF1430 uses the same digital vector files that you would normally send to your flexible die suppliers. Our technology will make you more profitable, and more competitive, when it comes to delivering shorter runs and customization to your customers.

The IntoPrint RF1430 digital finishing system is the answer to every label converter's need for finishing short runs of labels with custom shapes and quick delivery to their customers. The IntoPrint RF1430 eliminates the inherent costs, delays, and limitations of more conventional die cutting processes right from Adobe Illustrator or Corel Draw using the same vector file that would normally be sent out for die manufacturing.

The IntoPrint RF1430 comes standard with a touch screen PC interface that makes it easy to set up and operate. Simple user adjustments allow your operator to easily fine tune the operation of the machine to suit even the most difficult label designs. Sized to accommodate most label converters' needs — it can convert printed materials from any digital or analog print process.

One-up your competitors with the IntoPrint RF1430 digital finishing system. It's estimated that 25 – 30% of all jobs in the U.S. label-printing industry are run lengths of 5,000 linear feet or less. Higher volumes of short runs keep driving installation rates of digital label presses however the majority of digital press users are still die-cutting offline using traditional flexible dies and magnetic cylinders. Start finishing on-demand now with the IntoPrint RF1430!
